Yashasvi Shukla

Ghaziabad, India | 8796456455 | yashasvi.shukla.me@gmail.com | LinkedIn | Github | Portfolio

Summary

Full-stack engineer building backend systems and AI-powered platforms.

Education

KIET Group of Institutions
Master of Technology in Computer Science and Engineering — *Delhi-NCR, Ghaziabad*

RKGIT, Ghaziabad
Bachelor of Technology in Computer Science and Engineering — *Delhi-NCR, Ghaziabad*

Experience

Full Stack Engineer - AI Startup — Jan 2026 – Present
(Worked on Legal Case Management Platform)

- Built a production-grade multi-tenant legal platform handling claims, litigants, document pipelines, and communication workflows
- Built scalable backend services with tenant isolation, JWT authentication, and optimized data access using Node.js and MySQL
- Implemented centralized audit logging with action tracking, failure handling, and field-level changes for compliance
- Currently building a multi-tenant resource management platform with workspaces, users, clients, and role-based workflows

Software Engineer - Credex Technology — Jan 2023 – March 2023
Noida, Uttar Pradesh, Full-Time

- Contributed to frontend development using React and JavaScript across internal and open-source projects
- Built features for a task management system, focusing on UI components and client-side logic

Projects

CodeForge - Distributed Coding Platform | *React, Node.js, Express, MongoDB, Docker, Judge0* | Live | GitHub

- Designed async execution pipelines for concurrent code submissions and scalable evaluation workflows
- Implemented secure multi-language code execution using Docker and Judge0
- Built backend services for submission handling, execution workflows, and test validation

ModelForge - AutoML & MLOps Platform | *Python, MLflow, Docker, AWS, FastAPI* | Live | GitHub

- Developed an MLOps platform for training, tracking, and deploying ML models
- Integrated MLflow for experiment tracking, model versioning, and artifact management
- Deployed containerized ML inference services using Docker and AWS

TalentForge - Resume Intelligence Platform | *Python, FastAPI, NLP, Scikit-learn* | Live | GitHub

- Built an AI-powered resume analysis system using NLP for skill extraction and job matching
- Developed REST APIs using FastAPI for inference and candidate ranking

Technical Skills

Languages: Python, JavaScript, SQL
Backend & Web: Node.js, Express, FastAPI, React, Next.js, REST APIs
Databases: MySQL, MongoDB, PostgreSQL
Infrastructure: Docker, AWS, Prometheus
Core Concepts: Data Structures & Algorithms, System Design, JWT Authentication, AI/ML

Achievements & Problem Solving

- Published research papers on Reinforcement Learning for Memory Management in Language Model Agents and Retrieval-Augmented Generation Systems
